ELSEVIER

Colloids and Surfaces
A: Physicochemical and Engineering Aspects 109 (1996) xi–xii

COLLOIDS AND SURFACES A

Contents of Volume 109

Special Issue: A collection of invited papers by Japanese researchers

Preface ix

1. Aerosols

Three-dimensional simulation of air cyclone and particle separation by a revised-type cyclone
H. Yoshida (Higashi-Hiroshima, Japan) 1

Flow-field prediction and experimental verification of low Reynolds number gas–particle turbulent jets
S. Yuu, K. Ikeda and T. Umekage (Kitakyushu, Japan) 13

Dry dispersion of fine particles
H. Masuda and K. Gotoh (Kyoto, Japan) 29

Experimental evaluation of ion-induced nucleation in nanometer-aerosol formation by α-ray radiolysis of $SO_2/H_2O/N_2$ mixtures
M. Adachi, K. Okuyama, T.-o. Kim, H. Kadono and S.J. Cho 39

2. Colloidal Dispersions

Production of core–shell composite polymer particles utilizing the stepwise heterocoagulation method
M. Okubo and Y. Lu (Kobe, Japan) 49

Preparation of colloidal silver–palladium alloys by UV-irradiation in mixtures of acetone and 2-propanol
K. Esumi, M. Wakabayashi and K. Torigoe (Tokyo, Japan) 55

Relation between yield stress and column thickness in electrorheological fluids
Y. Otsubo (Chiba-shi, Japan) and K. Edamura (Tokyo, Japan) 63

Electrophoretic mobility of a particle covered with a partially ion-penetrable polyelectrolyte layer
H. Ohshima and K. Makino (Tokyo, Japan) 71

Importance of electrical double layers in structural and diffusional properties of deionized colloidal suspensions
T. Okubo (Kyoto, Japan) 77

Viscoelastic characterization of solid-like structure in aqueous colloids of globular proteins
H. Inoue and T. Matsumoto (Kyoto, Japan) 89

Preparation of monodisperse microspheres using the Shirasu porous glass emulsification technique
S. Omi (Tokyo, Japan) 97

Dispersion mechanism of coagulated particles in liquid flow
Y. Endo and Y. Kousaka (Sakai, Japan) 109

Direct observation of the formation of loop-like agglomerates of spindle-type hematite particles due to weak magnetic interactions
M. Ozaki, J. Sanada and A. Isobe (Yokohama, Japan) 117

Magnetic properties of ultrafine magnetite particles and their slurries prepared via in-situ precipitation
J. Lee, T. Isobe, M. Senna (Yokohama, Japan) 121

Adsorption activity and conformation of α-amylase on various ultrafine silica particles modified with polymer silane coupling agents
A. Kondo (Kobe, Japan), T. Urabe and K. Yoshinaga (Kitakyushu, Japan) 129

Rotational diffusion of ellipsoidal latex particles in dispersion as studied by depolarized dynamic light scattering
H. Matsuoka, H. Morikawa and H. Yamaoka (Kyoto, Japan) 137

Modification and functionalization of hydrogel microspheres
H. Kawaguchi, K. Fujimoto, Y. Nakazawa, M. Sakagawa, Y. Ariyoshi, M. Shidara, H. Okazaki (Yokohama, Japan) and Y. Ebisawa (Osaka, Japan) 147

Preparation of monodisperse platelet-type hematite particles from a highly condensed β-FeOOH suspension
T. Sugimoto, S. Waki, H. Itoh and A. Muramatsu (Sendai, Japan) 155

Effects of magnetic field on water investigated with fluorescent probes
K. Higashitani, J. Oshitani and N. Ohmura (Kyoto, Japan) 167

Desorption behavior of polystyrene from porous glass beads; studied by continuous elution method
M.-H. Chen, K. Furusawa (Ibaraki, Japan) 175

3. Micelles and emulsions
Interfacial properties and emulsification in systems of perfluoropolyether/non-fluorinated oil/partially fluorinated oligomeric and polymeric compounds
M. Morita, M. Kubo (Osaka, Japan) and M. Matsumoto (Kyoto, Japan) 183
Immune lysis assay of antibodies by use of antigen-coupled liposomes
S. Katoh (Kyoto, Japan), M. Kishimura and K. Tomioka (Hyogo, Japan) 195
Solubilization of arenes and *n*-Alkylbenzenes into ionic surfactant micelles
Y. Moroi, T. Morisue, M. Take-uchi and O. Shibata (Fukuoka, Japan) 201
Phase behaviour of polyoxyethylene hydrogenated castor oil in oil/water system
H. Kunieda, Y. Hasegawa, A.C. John (Yokohama, Japan), M. Naito and M. Muto (Tokyo, Japan) 209
Mechanism of protein solubilization in sodium bis(2-ethylhexyl) sulfosuccinate water-in-oil microemulsion
K. Kawakami, M. Harada, M. Adachi and A. Shioi (Kyoto, Japan) 217
Determination of binding constants of sodium and chloride ions and aggregation numbers of amphoteric surfactant microemulsions by a novel numerical analysis
K. Yoshihara, N. Momozawa, T. Watanabe, K. Kamogawa, H. Sakai (Chiba, Japan) and M. Abe (Tokyo, Japan) 235
Synthesis of monodisperse ZrO_2 particles in polyoxyethylated nonionic reversed micelles
T. Kawai, A. Fujino and K. Kon-No (Tokyo, Japan) 245
Enzymatic reaction in water-in-oil microemulsions
Y. Miyake (Suita-city, Japan) 255
Dodecyldimethylamine oxide micelles: stability, aggregation number and titration properties
H. Maeda (Fukuoka, Japan) 263
Dispersion of stratum corneum in aqueous mixed solutions of surfactant and terpene: the effect of mixtures of *N,N*-dimethyldodecylamine oxide and α-Terpineol
K. Takahashi, M. Hosaka, Y. Hanabusa, E. Ogawa, N. Suzuki, S. Hayashi, E. Yamada, M. Takahashi, S. Fukushima, H. Kamoda and M. Ueno (Tokyo, Japan) 273
Effect of the head group of phospholipids on the acyl-chain packing and structure of their assemblies as revealed by microcalorimetry and electron microscopy
M. Kodama and T. Miyata (Okayama, Japan) 283
SANS investigation of supramolecular assemblies constructed in aqueous alkyldimethylamine oxide solutions with organic additives
T. Imae (Nagoya, Japan) 291
Structure and properties of AOT reversed micelles as studied by the fluorescence probe technique
M. Hasegawa, T. Sugimura, Y. Shindo (Chiba, Japan) and A. Kitahara (Tokyo, Japan) 305

4. Films and Surfaces
Molecular assembly formation in a solid nanospace
K. Kaneko (Chiba, Japan) 319
Molecularly resolved observation of anisotropic intermolecular force in a formate-ion monolayer on a TiO_2 (110) surface scanning tunneling microscopy
H. Onishi, K.-i. Fukui and Y. Iwasawa (Tokyo, Japan) 335
Surface forces between protein A adsorbed mica surfaces
M. Hato (Ibaraki, Japan), M. Murata (Tokyo, Japan) and T. Yoshida (Shizuoka, Japan) 345
Two-dimensional self-assembly of colloids in thin liquid films
K. Nagayama (Tokyo, Japan) 363
Specific adsorption of flagellar FliF protein ring on mica surfaces as studied by atomic force microscopy and FT-IR spectroscopy
K. Kurihara, M. Mizukami, K. Suzuki and K. Oosawa (Nagoya, Japan) 375
